**Co-living, Micro Units, Live / Work, and Efficient Design...**the ULI San Diego – Tijuana Young Leader Group will highlight the companies, designers and thought leaders who are disrupting the way we approach urban residential development.

Massive societal and economic shifts are catalyzing creative opportunities for developers and radically shaking up the way we approach residential development. Contrary to popular belief, these shifts are not exclusive to millennials. Rather they are happening across nearly every demographic. The panel discussion led by the Young Leader Group will highlight the emerging projects that are disrupting the traditional housing industry. Topics to be discussed include micro units, co-living housing models, efficient design and market acceptance.

**Moderated by:** Rammy Cortez, Hub and Spoke Communities

### Panelists:

- Hector Perez, De-Arc
- Sidnev Muldrow, Canter Companies
- Ellen Parry, Ollie
